Educational objectives (max. 6 items)

- C1. To familiarize students with the most important principles and techniques of culturing cells and tissues.
- C2. To familiarize students with the use of cell and tissue cultures in research: the study of cytotoxicity of drugs, mechanisms and processes of biotransformation
- C3. Presentation of options for further use *in vitro* culture in medicine: tissue engineering, transplantology, oncology

## Education result matrix for module/course in relation to verification methods of the intended education result and the type of class

|                                   |   | result and the type of class  |   |   |
|-----------------------------------|---|---|---|---|
| Number of course education result | Number<br>of major<br>education<br>result | Student who completes the module/course knows/is able to  | Methods of verification of intended education results (forming and summarising) | Form of didactic class **enter the abbreviation |
| W01.                              | B.W29.                                    | knows the principles of conducting scientific, observational and experimental research as well as in vitro research for the development of medicine | oral response   | LC  |
| W02.                              | C.W20.                                    | explains the basics of disinfection, sterilization and aseptic treatment  | activity in the discussion, oral response                                       | LC  |
| W03.                              | C.W40.                                    | describes the problem of drug resistance, including multi-drug resistance   | activity in the discussion  | LC  |
| W04 <sub>*</sub>                  | C.W11,                                    | knows the genetic mechanisms of the acquisition of drug resistance by microorganisms and cancer cells   | activity in the discussion  | LC  |
| W05.                              | B.W19.                                    | knows the basic range of issues of stem cells and their applications in medicine  | activity in the discussion, oral response                                       | LC  |
| U01.                              | B.U9.                                     | knows how to operate simple measuring instruments and assess the accuracy of measurements   | presentation  | LC  |
| U02.                              | B.U13.                                    | can plan and perform simple scientific<br>research and interpret their results and<br>draw conclusions  | presentation  | LC  |

<sup>\*\*</sup> L - lecture; SE - seminar; AC — auditorium classes; MC — major classes (non-clinical); CC — clinical classes; LC — laboratory classes; SCM — specialist classes (magister studies); CSC — classes in simulated conditions; FLC — foreign language course; PCP practical classes with patient; PE — physical education (obligatory); VP — vocational practice; SS — self-study, EL — E-learning.

Please mark on scale 1-5 how the above effects place your classes in the following categories: communication of knowledge, skills or forming attitudes:

Knowledge: 5

Skills: 3

Student's amount of work (balance of ECTS points)

| Student's workload                                 | Student Workload (h) |
|--|----------------------|
| (class participation, activity, preparation, etc.) |                      |
| 1. Contact hours:                                  | 10                   |
| 2. Student's own work (self-study):                | 3                    |
| Total student's workload                           | 13                   |
| ECTS points for module/course                      | 0,5                  |
| Comments -   |                      |

Content of classes (please enter topic words of specific classes divided into their didactic form and remember how it is translated to intended educational effects)

| ar | tu | res |  |
|----|----|-----|--|
|    |    |     |  |

Seminars -

## Classes (LC)

- 1. Work rules under aseptic conditions. The culture environment understanding of the types of cell culture media and other necessary reagents, culture flasks. The basic equipment in cell culture laboratory. Establishment and maintenance of the cell culture. (5 hours)
- 2. Assessment of cancer cells sensitivity to cytostatics. The multidrug resistance and methods of overcoming this phenomenon. The use of *in vitro* cultures in science and medicine. Tissue and organ models tissue engineering. Observation of the different cell types, work with inverted microscope. (5 hours)

## Other -

Basic literature (list according to importance, no more than 3 items)

- 1. Human cell culture: volume V, F. Koller, John Masters, Bernhard R Palsson, Springer-Verlag GmbH, 2001 Additional literature and other materials (no more than 3 items)
- 1. Basic cell culture protocols, Helgeson, Humana press, 2004

Didactic resources requirements (e.g. laboratory, multimedia projector, other...)

Laboratory, laminar, CO₂ incubator, inverted microscope, laboratory desks, laboratory plastics, cell culture reagents, seminar room, multimedia projector

Preliminary conditions (minimum requirements to be met by the student before starting the module/course) -

Conditions to receive credit for the course (specify the form and conditions of receiving credit for classes included in the module/course, admission terms to final theoretical or practical examination, its form and requirements to be med by the student to pass it and criteria for specific grades)

The course ends with credit (without an examination The condition for credit is to prepare a presentation on a given subject and answer the questions from the material learned during the classes. Each absence must be made up, including rector's days or dean's hours.

| Grade:                  | Criteria for course                |
|-------------------------|------------------------------------|
| Very Good (5.0)         | correct answer to min. 16 question |
| Good Plus (4.5)         | correct answer to min. 14 question |
| Good (4.0)              | correct answer to min. 12 question |
| Satisfactory Plus (3.5) | correct answer to min. 10 question |
| Satisfactory (3.0)      | correct answer to min. 8 question  |

| Grade:                  | Criteria for exam (if applicable) |
|-------------------------|-----------------------------------|
| Very Good (5.0)         |                                   |
| Good Plus (4.5)         |                                   |
| Good (4.0)              |                                   |
| Satisfactory Plus (3.5) |                                   |
| Satisfactory (3.0)      |                                   |
