

Syllabus for academic year 2017/2018														
Description of the course														
Module/Course	Medyczno-sądowe aspekty anatomii stosowanej. Forensic aspects of practical anatomy										Group of detailed education results			
											Group code	Group name		
											A	Morphological sciences		
											G	Legal and organizational aspects of medicine		
Faculty	Medicine													
Major	medicine													
Specialties	Not applicable													
Level of studies	Uniform magister studies x* 1 st degree studies <input type="checkbox"/> 2 nd degree studies <input type="checkbox"/> 3 rd degree studies <input type="checkbox"/> postgraduate studies <input type="checkbox"/>													
Form of studies	x full-time x part-time													
Year of studies	I-V					Semester		x Winter x Summer						
Type of course	<input type="checkbox"/> obligatory <input type="checkbox"/> limited choice x free choice / elective													
Course	x major <input type="checkbox"/> basic													
Language of instruction	<input type="checkbox"/> Polish x English <input type="checkbox"/> other													
* mark <input type="checkbox"/> with an X														
Number of hours														
Form of education														
Unit teaching the course	Lectures (L)	Seminars (SE)	Auditorium classes (AC)	Major Classes – not clinical (MC)	Clinical Classes (CC)	Laboratory Classes (LC)	Classes in Simulated Conditions (CSC)	Practical Classes with Patient (PCP)	Specialist Classes – magister studies (SCM)	Foreign language Course (FLC)	Physical Education obligatory (PE)	Vocational Practice (VP)	Self-Study (Student's own work)	E-learning (EL)
Winter OR Summer Semester														
Forensic Medicine Department				30										
TOTAL per year:														

Forensic Medicine Department			30										

Major Classes - Application was filed in order to obtain the consent to perform classes in smaller groups to achieve optimal educational results.

Educational objectives (max. 6 items)

C1. Learning about practical forensic uses of chosen aspects of anatomy, topographical anatomy and pathology, with special accent being put on traffic accidents investigations.

C2. Practical using of anatomic knowledge in diagnosing and documenting various lesions, medical procedures and anthropologic data, both in case of patients who are alive and dead.

C3. Make connection between the knowledge acquired from the earliest years of the medical study, most of that is mainly theoretical, and crucial practical problems encountered at work by medical professionals, this way arming the students with more motivation to study in depth and widen their medical knowledge in the anatomy-connected fields.

Education result matrix for module/course in relation to verification methods of the intended education result and the type of class

Number of course education result	Number of major education result	Student who completes the module/course knows/is able to	Methods of verification of intended education results (forming and summarising)	Form of didactic class <i>**enter the abbreviation</i>
W1	A.W2	knows how the human body is composed topographically (upper and lower extremity, chest, abdomen, pelvis, back, neck, head) and functionally (bones and joints, muscles, circulatory system, respiratory system, digestive system, urinary system, sexual organs, nervous system, sensory organs)	oral response (F & S)	MC
W2	A.W3	describes topographic relations between organs	oral response (F & S)	MC
W3	G.W15	knows legal basics of physicians behavior at the place of corpse discovery and those of performing forensic autopsy	oral response (F & S)	MC
W4	G.W16	knows rules of forensic diagnostics and opinion forming in cases of traffic accidents victims	oral response (F & S)	MC
U 01	G_U5	Performs the trauma outcome assessment and its legal classification.	Procedure description (F & S)	MC
U 02	G_U7	Can take blood samples for toxicological testing.	Procedure description (F & S)	MC

** L - lecture; SE - seminar; AC - auditorium classes; MC - major classes (non-clinical); CC - clinical classes; LC - laboratory classes; SCM - specialist classes (magister studies); CSC - classes in simulated conditions; FLC - foreign language course; PCP - practical classes with patient; PE - physical education (obligatory); VP - vocational practice; SS - self-study, EL - E-learning .

Please mark on scale 1-5 how the above effects place your classes in the following categories:
communication of knowledge, skills or forming attitudes:
Knowledge: 4
Skills: 4
Social competences: -

Student's amount of work (balance of ECTS points)	
Student's workload (class participation, activity, preparation, etc.)	Student Workload (h)
1. Contact hours:	30
2. Student's own work (self-study):	9
Total student's workload	39
ECTS points for module/course	1,5
Comments	

Content of classes (please enter topic words of specific classes divided into their didactic form and remember how it is translated to intended educational effects)

Practical classes

1-2. Current anatomy, topographical anatomy and pathology – introduction to rules of their forensic use.

3-4 External lesions – anatomic basis, rules of documenting, practical exercises when possible. Establishing and confirming identity of people alive and dead - anatomic basis, rules of documenting, practical exercises when possible.

5-6 Internal lesions – anatomic basis, rules of documenting, practical exercises when possible. Introduction to modern medical imaging techniques use in forensic medicine.

7-8 Medical procedures–related lesions - anatomic basis, rules of documenting, practical exercises when possible.

9-10 Traffic accidents–related injuries – anatomic basis, rules of documenting, practical exercises when possible. Forensic uses of human bones – anatomic basis, rules of documenting, practical exercises when possible.

Other

1.
etc. ...

Basic literature (list according to importance, no more than 3 items)

- DiMaio V., DiMaio D., „Forensic Pathology”, CRC Press, 2001
- DiMaio V., „Gunshot Wounds”, CRC Press, 1999
- DiMaio V., „Handbook of Forensic Pathology”, CRC Press, 2007

Additional literature and other materials (no more than 3 items)

- Saukko P., Knight B., „Knight’s Forensic Pathology”, Edward Arnold, 2004 or later

Didactic resources requirements (e.g. laboratory, multimedia projector, other...)
autopsy room; exercise room with multimedia projector

Preliminary conditions (minimum requirements to be met by the student before starting the module/course)
General orientation in human anatomy.

Conditions to receive credit for the course (specify the form and conditions of receiving credit for classes included in the module/course, admission terms to final theoretical or practical examination, its form and

requirements to be met by the student to pass it and criteria for specific grades)
presence in classes and oral response

Grade:	Criteria (only for courses/modules ending with an examination)
Very Good (5.0)	-
Good Plus (4.5)	-
Good (4.0)	-
Satisfactory Plus (3.5)	-
Satisfactory (3.0)	-

Name and address of module/course teaching unit, contact: telephone and e-mail address

Forensic Medicine Department
4 Mikulicz-Radecki Str
50-345 Wrocław, Poland
