W 04	D.W16.	Comments on history of medicine with special focus on history of dentistry	P-presentation – group project	SE
W 05	D.W17.	Describes the process of specialization within scientific discipline - medical sciences and the achievements of the most important personalities in the history of medical sciences	written assignment	SE
U 01	D.U1.	respects in the course of treatment socially and culturally conditioned subjective desires and expectations of the patient	oral presentation	SE
U 02	D.U10.	collaborates in a team-work and in multi-cultural and multi- national environment	oral presentation	SE
U 03	D.U11.	follows ethical standards in his professional conduct	written assignment	SE
U 04	D.U12.	respects patient's rights	written assignment	SE
U 05	D.U16. analyzes critically the literature, including publications in English, and draws conclusions		abstract	SE
К 01		cooperates in a group	P-presentation: group project	SE
K 02		willingly participates in a discussion	oral presentation	SE

** L - lecture; SE - seminar; AC – auditorium classes; MC – major classes (non-clinical); CC – clinical classes; LC – laboratory classes; SCM – specialist classes (magister studies); CSC – classes in simulated conditions; FLC – foreign language course; PCP practical classes with patient; PE – physical education (obligatory); VP – vocational practice; SS – self-study, EL – E-learning .

Please mark on scale 1-5 how the above effects place your classes in the following categories: communication of knowledge, skills or forming attitudes:

Knowledge: 5

Skills: 5

Social competences: 5

Student's amount of work (balance of ECTS points)					
Student's workload	Student Workload (h)				
(class participation, activity, preparation, etc.)					
1. Contact hours:					
2. Online learning hours (e-learning):	10				
3. Student's own work (self-study):	4,5				
Total student's workload	14,5				
ECTS points for module/course	1				
Comments					

Content of classes (please enter topic words of specific classes divided into their didactic form and remember how it is translated to intended educational effects)

Seminars

- 1. Discovering the Body: Breakthrough Discoveries in Anatomy and Physiology.
- 2. "Great Fear": Epidemics in Human History
- **3.** A Century of Medicine: Progress in Medicine in the 19th c.
- 4. The Birth of Biopolitics. Fear of Degeneration and The Concept of Eugenics.
- 5. "Morderous Science": Medical Experimentation during WW II.

Basic literature (list according to importance, no more than 3 items)

1. Magner L.N., A History of Medicine, Tylor&Francis: London/New York 2005

2. Porter R., The Greatest Benefit to Mankind. A Medical History of Humanity from Antiquity to the Present, HarperCollinsPublishers: London 1997

3. Friedman M., Friedland G.W., Medicine's 10 Greatest Discoveries, Yale University Press: New Haven/London 1998

Additional literature and other materials (no more than 3 items)

1. Kiple K.F. (ed), Pox, Plague and Pestilence, Weidenfeld&Nicolson 1997

2. Siddhartha Mukherjee, The Gene. An intimate History, Scribner: New York, 2017

3. Alexander Mitscherlich, Fred Mielke, Doctors of Infamy: The Story of the Nazi Medical Crimes, first published: Henry Schuman: New York 1949

Didactic resources requirements (e.g. laboratory, multimedia projector, other...)

Multimedia projector, notebook

Preliminary conditions (minimum requirements to be met by the student before starting the module/course)

Not applicable

Conditions to receive credit for the course (specify the form and conditions of receiving credit for classes included in the module/course, admission terms to final theoretical or practical examination, its form and requirements to be med by the student to pass it and criteria for specific grades)

- Attendance in the seminars

- Satisfactory results of the test

All absentees must be made up for, including Rector's Days and Dean's Hours

Grade: Criteria (only for courses/modules ending with an examination)
